VENTURA TRACKER

Ventura Tracker utilises real time state-of-the-art GPS technology to monitor our bus services and provide peace of mind for our customers.

FEATURES

STUDENT SAFETY

ON TIME RUNNING PERFORMANCE

REAL TIME REPORTING

EASY TO USE TECHNOLOGY

PEACE OF MIND

HOW IT WORKS

Ventura Tracker uses GPS technology to track each school bus. Schools, parents and students can access this information via our APP or our Website to view where the bus is, the route the bus will take, the designated bus stops, and the times for each stop (Scheduled, Actual, and Departed). The school can also track each student's use of the bus through a touch on/touch off system. If the school allows, parents can also see when your Students are on board the bus and when they leave the bus. Push notifications are also available for Traffic incident, Bus times and Student on board registration.

PARENTAL ACCESS

Schools have ownership and control of student data on Ventura Tracker in relation to Student ID registration.

STUDENT ID CARDS

Ventura Tracker uses Near Field Communication (NFC) technology ID cards and can be sourced with our partnered smart technology provider that allows schools to print cards onsite and instantly keep track of student trips in real time.

VENTURA TRACKER APP FEATURES

- Real time student tracking
- Rate & leave driver feedback
- Save your favourite route
- Report your lost property
- Bus arrival notifications
